

# Preventive Care Plan: Puppy

*Avon Animal Hospital wants to be the primary caregiver for your special family member throughout every stage of life. We will strive to make that both convenient and affordable for you.*

## Benefits

It's true that pets age faster than humans and while their lives progress more quickly, serious medical conditions do too. A preventive care plan can help detect and prevent serious medical conditions before they become unmanageable, ultimately improving the quality and length of your pet's life. Our plans include:

- ▶ All necessary vaccines & screenings
- ▶ Spay or Neuter
- ▶ Affordable payment options
- ▶ Save on plan services
- ▶ Save on other services & products

Every Preventive Care Plan includes all necessary examinations, vaccines, screenings and treatments essential to protect your pet against illness and disease. Our veterinarians will customize your pet's plan to ensure they receive only the serviced they feel are needed. The below serves as a guide only.

Puppy	Basic	With Spay/Neuter
Initial Exam with Vaccine Administration	🐾	🐾
Examinations with Booster Administration	🐾	🐾
